SED in latitude stripes, $b \in (-2°, 2°)$

$\ell \in (-10°, 0°)$

PL: $\gamma = 2.08$, $-\log L = -16749.74$, $\frac{\chi^2}{\text{d.o.f.}} = 38.30$

IC: $\gamma = 2.35$, $-\log L = -16507.22$, $\frac{\chi^2}{\text{d.o.f.}} = 92.20$

π^0: $\gamma = 2.11$, $-\log L = -16748.57$, $\frac{\chi^2}{\text{d.o.f.}} = 38.99$

LogPar: $\alpha = 0.25$, $\beta = -0.03$,
$-\log L = -16751.10$, $\frac{\chi^2}{\text{d.o.f.}} = 37.55$

$\ell \in (0°, 10°)$

PL: $\gamma = 2.79$, $-\log L = -1085.62$, $\frac{\chi^2}{\text{d.o.f.}} = 420.62$

IC: $\gamma = 3.53$, $-\log L = -1168.50$, $\frac{\chi^2}{\text{d.o.f.}} = 540.51$

π^0: $\gamma = 1.83$, $-\log L = 601.89$, $\frac{\chi^2}{\text{d.o.f.}} = 465.34$

LogPar: $\alpha = -11.42$, $\beta = 2.48$,
$-\log L = -2069.85$, $\frac{\chi^2}{\text{d.o.f.}} = 91.11$
